\*\*Startup cost: 1 month deposit, Installation 180USD, cost of FTTH receiver (CPE), 1<sup>st</sup> month payment, +VAT

\*\*Optional: Router=50USD

### FTTH and Fiber

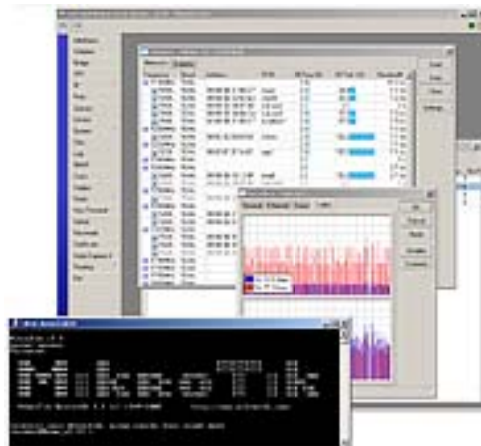

#### Bringing the Future to Your Community

No longer just something to look for in a breakfast cereal, Fiber is the future of communications technology. Fiber optics harness the power and speed of light to bring you incredible possibilities and total convenience. By providing all services through Fiber optic cables (instead of through coaxial cables or over phone lines), we are able to deliver the latest in communications technology as well as positioning you for future technological advancements. With Fiber from FTTH, supreme connection reliability, there's no limit to where you can go and what you can accomplish. From lightning-fast downloads to seamless video conferencing to high reliability IP lease-line and VP, Fiber brings the world to your Business.

#### Enterprise Traffic Control Server (ETCS)

It can also be installed on a PC and will turn it into a router with all the necessary features - routing, firewall, bandwidth management, wireless access point, backhaul link, hotspot gateway, VPN server and more.

#### ETCS Major features:

- Powerful routing and QoS control
- Users Radius, high security
- Per Users bandwidth control
- Time factor bandwidth control
- Per Users usage graphic monitoring
- P2P traffic filtering
- Encrypted VPN
- Advanced Quality of Service
- Stateful firewall, tunnels
- Tons of other new features for managed network administration

#### FTTH Corporate

- Start from USD38 per month
- Unlimited usage
- Low sharing factor
- FTTH with high speed and high reliability
- Increase to 1Mbps as needed
- Free network administration support
- Free Wifi router setup

#### Lease Line

- Best price in town, USD1388 1Mbps/month
- Low setup cost
- No more sharing with others
- Guarantee 1:1 bandwidth at all time
- Expand to 10Mbps or higher as needed
- Free network administration support
- Free setup and commissioning of ETCS
- Option to block bit-torrent

#### VPN Local-Loop

- Why pay 5 times more for local traffic?
- Ideal solution for off-site Disaster Recover Backup server connectivity
- Private IP-CCTV network access
- FTTH Link, guarantee bandwidth
- VPN or point-to-point with high security
- Shares managed Internal access at various sites locations within an organization
- P2P FTP within your organization
- Up to 100Mbps upload and download
